TEACHING WALLS / HORIZONTAL DRY MARKERBOARD, CHALKBOARD AND TACKBOARD

SUGGESTED INSTALLATION INSTRUCTIONS FOR TWO PANEL TEACHING WALL SLIDER

Note: Complete installation hardware as furnished is included with each unit. If wall construction prevents the use of hardware as furnished, it is responsibility of the customer to furnish the required fasteners. Note: All units are made custom for each job.

1. Open crates, cartons, etc. inspect panels and tracks prior to installation.
2. Check shop drawing as to the type of unit you are about to install. Note: Check for height of opening of case work before installation.
3. Install top track per approved shop drawings or per final construction plans.
4. Aluminum top track should be installed with suitable anchors (#8 - $\frac{3}{4}$ " zinc plated fasteners @ 16" o.c. recommended).
5. Aluminum bottom guide track should be installed with with suitable anchors (#8 - $\frac{3}{4}$ " zinc plated fasteners @ 16" recommended o.c. or 24" o.c.) staggered
6. Once both tracks have been properly installed, clean top track, bottom track and with a clean cloth remove any debris from bottom track.
7. Proceed by sliding top carrier on to top track. 2ea carriers per sliders in most cases, If slider panel exceeds 10'-0" use 3 carriers recommended per slider.
8. inspect the carrier assembly and make sure all four wheels spin freely prior to installation.
9. Once the carriers have been properly mounted, remove the protective plastic film from the back slider.
10. Proceed to hang the back slider first and move the slider left to right a few times to make sure that there's no obstructions on the tracks.
11. Repeat step # 9 for the front panel. Upon completion proceed to hang the last panel on to the front track and repeat step #10
12. After sliding units have been properly hung. Proceed to clean the porcelain surfaces with windex or soap and water and dry with a soft cloth in a circular motion.
13. Teaching walls are ready for use.
