

Product Data - Series TWS Teaching Wall Slider

Teaching Wall Slider

Since 1953, Nelson Adams NACO has created products to meet the needs of multipurpose rooms such as classrooms, labs and conference rooms. Independently owned and operated, the company focuses on precision-focused technology to create outstanding products.

- TWS substrate construction consists of e3 porcelain on 1/2" fiberboard with .015 moisture resistant backer. All units consist of a set of top & bottom satin clear anodized aluminum tracks, also include C4-J perimeter trim, standard integrated blade tray with radius edges.

Proud Partner of:
