

## **NELSON ADAMS/NACO FOLDING TABLES AND BENCHES CARE & MAINTENANCE INSTRUCTIONS**

Before operating tables and benches, all users must review the training DVD that is supplied with each order.

Nelson Adams/NACO folding tables and benches require only normal maintenance and a periodic inspection that should be performed every three months.

Clean laminate tops with spray cleaner similar to Windex and wipe with a soft cloth. Mild soap can be used for stains.

Twice a year, lubricate all moving components (nuts, bolts, and knox locks) with a food grade silicone spray.

Guide tracks in pockets should be lubricated with paraffin wax as required.

To ensure safe operation and storage, tables and benches should be taken in and out of the pockets properly.

**Any inquiries or comments contact our corporate office.**
